Executive Search = Active Search

Knowledge-based industries require talented candidates with technical backgrounds and solid track records. The best candidates are not posting on job boards and do not answer newspaper advertisements. Recruiting in Asia-Pacific adds new challenges -- It's a unique market and recruiters need to be different. You need a recruiting company that actively sources candidates by direct cold-calling, screening face-to-face and guaranteeing results.

Asia-Pacific

Japan, Greater China, Korea, Singapore, Taiwan, Singapore, South Asia.

High Technology Markets

Nanotechnology, Industrial Process Technology, Processing and Manufacturing, Software, Networking, Semiconductor, Emerging Technologies, Test & Measurement.

Executive Search

-

Country General Managers;

-

Company Directors for Sales and Operations;

-

Middle Management;

-

Key Technical Hires, and

-

Professional Services (Accounting-Finance, HR, and IT Managers) for High-Tech Clients.

Verify the GESS Success!

Past success is the best predictor of future Results.

We invite prospective clients to verify the GESS track record of successful, long-term placements.

At our first meeting with you, we will provide you with:

- A verifiable, printed report of our most recent placements including the names of clients who wish to be identified
- A list of active and up to date referrals for you to contact, many of whom you may know
- A corporate outline with a historical sheet of placements inside industry segments.

All of the above are updated Quarterly so information remains relevant to your industry segment.

For a partial glimpse of our successful recruitment record, check the following list of past placements.

(Last revised May, 2008).
